LeetCode

Portfolio

EDUCATION

Harcourt Butler Technical University

Bachelor of Technology in Computer Science and Engineering - **CGPA - 8.35**

Dec 2021 – May 2025

Kanpur, Uttar Pradesh

Sanjay Kumar Saraswati Vidya Mandir Inter College

Intermediate **Percentage - 78.8%**

Apr 2019 – Mar 2020

Shahjahanpur, Uttar Pradesh

EXPERIENCE

Graviti (ISUA Solutions Pvt. Ltd.)

Frontend Developer Intern

May 2023 – Aug 2023

Remote

- Implemented a major feature **photo-viewer**, where consignees can view the images of the goods transported.
- Improved the efficiency of the code by making the **components reusable** which reduced the loading time of the website
- Tech Stacks: **ReactJS, NextJS, Ant Design**

crackDSA

Software Developer Intern (Frontend)

March 2023 – May 2023

Kanpur, Uttar Pradesh

- Indulged with the **Job Search CrackDSA** development which helps job seekers to find new opportunities.
- Developed **category-wise filtration** which improves the user's experience.
- Integrated **Expressjs** backend functionality seamlessly into the frontend codebase for enhanced application performance and functionality.
- Tech Stacks: **ReactJS, Tailwind CSS**

SKILLS

Languages: C, C++, JavaScript

Technologies/Frameworks: ReactJS, Redux, ExpressJS, MongoDB, Tailwind CSS, Git, Github

Coursework: Data Structures and Algorithms, Object Oriented Programming, Database Management System, Computer Network, Operating System

PROJECTS

HomeBliss | ReactJs, ExpressJs, MongoDB

4 Weeks

- A comprehensive web application designed to facilitate the management of real estate properties, catering to the needs of property owners and buyers.
- Using **React JS**, components are modularized and organized, allowing for efficient development, and maintenance of the frontend codebase. The use of React libraries for styling makes it more appealing and pleasing.
- Express JS** serves as the backend framework, for handling client requests and interacting with the database, **MongoDB. JSON Web Tokens (JWT)** are employed for user authentication.

My_Kart | ReactJs, ExpressJs, MongoDB, Tailwind CSS

3 Weeks

- This website is a basic prototype of an e-commerce website that allows users to explore various available products and assemble them in their cart.
- React JS** allows the smooth rendering and functioning of the website. The use of **Tailwind CSS** makes the design appealing and attractive.
- Expressjs** serves as the backend framework for handling HTTP requests from the frontend, and **MongoDB** is used to store the data of the users and the products.
- [Live site here](#)

Achievements

- Max rating **1844** at Leetcode and solved over **600** problems.
- Secured a Global Rank of **1098** in CodeVita Season 11 organized by TCS. [Certificate Link](#)
- Secured a Global Rank **53** in CodeRush September '23 organised by Newton School. [Certificate Link](#)
- Selected as the sole representative from the second year to share the stage with world-renowned poets at the prestigious college poetry event, **Kavya Sandhya**.
